Tier III Gold Certification of Operational Sustainability of Gtd Colombia – Datacenter El Poblado, Phases 1 and 2 in Medellín, Colombia

Dear Andres Felipe Giraldo Henao,

Uptime Institute Professional Services is pleased to announce the Tier Certification of Operational Sustainability of the Gtd Colombia – Datacenter El Poblado, Phases 1 and 2 as fulfilling Tier III Gold criteria. This Certification recognizes Datacenter El Poblado, Phases 1 and 2 Operational Sustainability as realizing the full uptime potential of the Tier III installed infrastructure. Exceptional Management & Operations and Building Characteristics behaviors along with low site risks were observed during the Uptime Institute Professional Service assessment on 6–8 January 2026.

This Certification supersedes the Tier III Gold Certification of Operational Sustainability for Gtd Colombia – Datacenter El Poblado, Phases 1 and 2 with 30 December 2025 expiry.

Adherence to these behaviors and mitigation of site risks have been proven to minimize opportunities for human error—the number one cause of data center downtime.

Overall, the Operational Sustainability of Datacenter El Poblado, Phases 1 and 2 meets the requirements for a Gold rating. This rating is valid until 20 January 2029.

Congratulations on this achievement.

Sincerely,

Christopher Brown
Chief Technical Officer
